

**STALCO SA**

Construction of LU.VO.  
(Luftvorwärmer) - Air Preheaters  
Ljungstrom Air Preheaters

# Fully automated production line

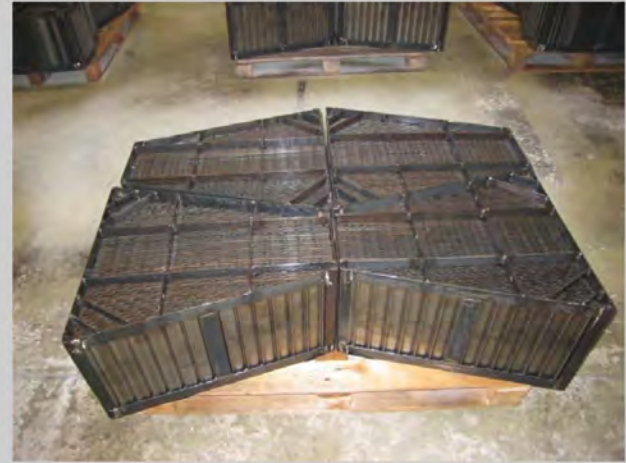

# Fully automated production line

The materials used and the design of the sheets is made according to our clients' specifications.

# Finished parts

# Finished parts

# Finished parts

The material of the metallic cage and the type of the welds is compatible with the type of metallic sheet used.

# Section Assembly Example

All the parts produced in our factory are sent to the Power Station and then they are assembled in sections, as seen in the image above.

Then the sections are combined to form the air preheater.
